# About Us

**Voltabyte** is an integrated engineering company operating in Pakistan with a goal to provide the best **practical**, **economical** and **efficient** solutions for our customers for their process and automation related problems.

At **Voltabyte**, we have brought together a team of skilled associates thriving to provide our customers with the best in the market solutions, at minimum costs, for your maximum peace of mind.

By utilizing the traditional and non-traditional methods, we offer the most innovative engineering solutions for the businesses and process industry that fulfilling our promise of "Innovation Today", since 2018, **Voltabyte** has been a total engineering solutions provider.

We have a team of highly skilled engineers that specialize in various fields of engineering and development along with our technical support and procurement staff.

## Our Mission

*Being customer centric organization,  
we believe in maximizing the highest  
level of contentment of our customers.*

## Our Vision

Our company has established a strong business relations with its consumers by catering to their ever-growing needs for innovative and cost cutting control systems and by providing best in class solutions to anticipate their needs.

## Industrial E&I Solutions

**Voltabyte** has been working closely with industries, utilities and infrastructure customers. We engineer integrated solutions using world-class technologies to reduce your operational costs. Our customized turn-key systems provide high efficiency and results at a competitive prices.

We provide Industrial process automation for all kind of process industry. Our other expertise include:

- **Balance of plant (BOP)**
- **Skids automation**
- **Building automation**

## Automation and IIoT

**Voltabyte** provides its customer with control and automation services with touch of the latest Industrial Internet of Things (IIoT) as an evolution to industrial automation systems. The IIoT allows data collection, exchange, and analysis, potentially facilitating improvements in productivity and efficiency as well as other economic benefits. We provide our clients with automation services utilizing the best available tools to refine and optimize the process control systems.

## Home Automation

### Improve your smart life experience!

We deliver lifestyle solutions for modern home bringing your imagination to life. We provide quality Home Automation services including, Energy Management Systems and custom-designed Access Control Systems for our clients to meet their unique requirements.

**Voltabyte** also provides Inverter Solutions and CCTV (wired/wireless) Home Security Systems and Installation/Maintenance services.

## Energy Management Solutions

Many facilities have complex structures of control management systems operating on separate proprietary communication networks. **Voltabyte** can assemble these systems on a common communication network, using energy conservation strategies results in lower consumption and facility management costs.

## Solar Energy Systems

**Voltabyte** offers cost-effective turnkey solar solutions for Residential, Commercial, Industrial and Agricultural sectors. With our experience with multi-kilowatt solar power generation systems and net metering systems, we thrive to meet and exceed expectations of both energy markets and clients.

## Field Services

To better serve our customers, we offer a wide range of field services including hook up of instruments, Cable laying/termination, field mechanical installations, Inspection and troubleshooting, testing and maintenance of electrical or mechanical structures and other relevant services.
